PROFESSIONAL EXPERIENCE

Associate Software Developer

04/2025 – present
kochi, India

Mygate

- **Improved UI & UX:** Enhanced UI components by refining design consistency, layout, and responsiveness to deliver a smoother user experience.
- **Backend Development (Django):** Built and maintained backend features using Django views, business logic, and optimized queries.
- **API & Feature Development:** Developed and integrated REST APIs, ensuring efficient data flow and contributing to full end-to-end feature delivery.
- **Cross-team Collaboration:** Worked closely with product, QA, and backend teams to implement UI/UX updates and maintain high design and development standards.
- **Agile Delivery:** Delivered quality features under tight deadlines in a fast-paced, startup-like environment.

Associate Software Developer Intern

08/2024 – 03/2025
infopark, Ernakulam,
India

MyGate

- Improved UI components by refining design consistency and layouts.
- Enhanced usability by contributing to intuitive, user-friendly interfaces.
- Supported the team in implementing UI updates and maintaining design standards.
- Delivered tasks on time while adapting to a fast-paced startup environment.

SKILLS

Programming Languages

Java, python, C

Web development

HTML, CSS , JavaScript, Django

Software tools

VS Code, Git, Jupyter, Postman, AWS (Basics),
Jenkins (Exposure)

Problem solving, learn and adapt to technologies Cross-Functional Team Collaboration

EDUCATION

Btech

Muthoot Institute of technology and Science - CGPA 8.75
Taken ML as elective in S7

11/2021 – 05/2025
Ernakulam, India

Higher secondary

AKG smaraka government higher secondary school - 96%

2019 – 2021
Kannur

PROJECTS

Machine Learning-Based Subjective Answer Evaluation System

12/2024

Python, TensorFlow, OpenCV, Tesseract OCR, BERT, Django, Git, Web Hosting

Developed an AI-powered system to automatically evaluate handwritten subjective answers using OCR for text extraction and a BERT-based NLP model for assessing relevance and answer quality. Built a lightweight web interface for uploading answer sheets and delivering instant evaluation results. Enhanced OCR accuracy through preprocessing techniques such as binarization, resizing, and noise reduction, and streamlined the entire grading workflow by integrating multiple ML components into one automated system.

Help Hub

01/2024 – 05/2024

Flutter, Firebase,

Developed a cross-platform mobile app using Dart and Flutter with features like period tracking for women, emergency assistance, and medication management for elderly users. Focused on delivering an accessible and user-friendly experience, while using Firebase for real-time data sync, secure authentication, and privacy.

CERTIFICATES

Full stack web development
HTML and CSS web development

BEC B1 preliminary
Cambridge English
Qualifications for business

**ML Algorithms and Model
Building L&T**
*with **First Class*** offered by
CollegeConnect Programme of
L&T EduTech during the period
21 Aug 2024 to 25 Dec 2024
